

OMB M-26-14 · LEVEL 2 (INTERMEDIATE)

Reach Level 2 logging maturity. One fixed price. Production-ready.

A fixed-scope Elastic engagement that takes your agency to M-26-14 Intermediate (Level 2) maturity, delivered by Elastic consultants, on-prem or in Elastic Cloud, with no new customer infrastructure to stand up.

\$39,990 firm fixed fee

On-prem & cloud

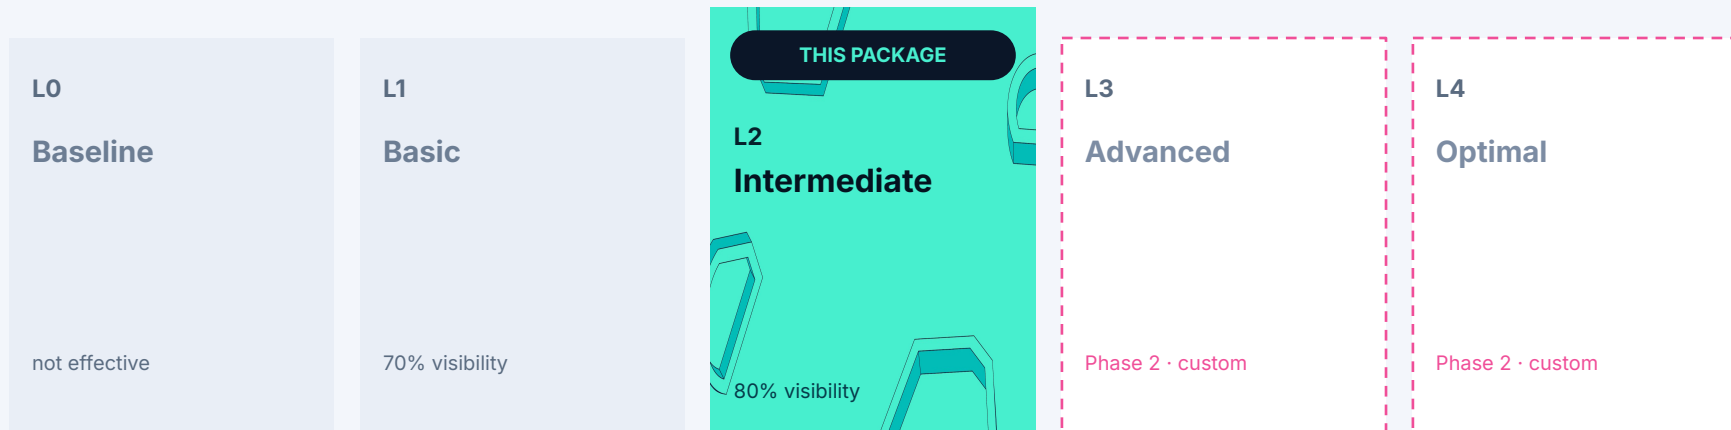

No new infrastructure

Passes inspection

M-26-14 MATURITY MODEL

Maturity is set by your weakest element

Levels 0–4. This package reaches and evidences Level 2 (Intermediate); Levels 3–4 are a tailored Phase 2.

WHY NOW

The mandate changed. The clock is about to start.

On May 22, 2026, OMB issued Memorandum M-26-14, replacing prescriptive retention rules with a risk-based maturity model (Levels 0–4). When CISA publishes the Logging Reference Architecture (LRA), the countdown begins, and overall maturity is set by your lowest-scoring element.

Compliance clock: days after LRA publication

source: OMB M-26-14

120 days

Level 1 · Basic

180 days

Level 2 · Intermediate ← target

320 days

Level 3 · Advanced

☛ The LRA has not published yet. Right now is the lowest-friction, lowest-cost window to reach a defensible Level 2 before the countdown starts, instead of racing the 180-day gate later.

THE END STATE

What it looks like when we hand it back

Continuous Event Monitoring

Real-time ingestion, detections, and alerting; logs searchable ≥ 6 months.

Threat hunting & forensics

Investigation-ready telemetry retrievable for ≥ 12 months.

80% asset visibility

In-scope IT, OT, and IoT assets discovered and logging.

Secure log storage

Logs centralized (or federated to your SOC) and encrypted at rest.

Zero Trust alignment

Visibility & Analytics mapped to CISA's Zero Trust Maturity Model.

Operational day one

Prebuilt dashboards, detection rules, and alerting your SOC uses now.

Inspection-ready pack

Evidence mapped to M-26-14 elements, ready for your assessors.

You own it

Full configuration handover, a runbook, and an enablement session.

THE PACKAGE

One scope. One price. No surprises.

Included

- ✓ Discovery & logging design workshop
- ✓ Elastic deployment & configuration (on-prem or Cloud)
- ✓ Ingest of prioritized sources to the L2 visibility bar
- ✓ CEM detections & alerting; THIRF retention
- ✓ Prebuilt dashboards & detection content, tuned
- ✓ Validation vs. L2 + inspection-ready evidence pack
- ✓ Config handover, runbook, and enablement session

Not included: Phase 2 / custom

- L3/L4 uplift: in-transit encryption + hashing, 90%+ capture
- Customer-side key management or long-term storage
- Custom collectors for OT/IoT without native logging
- Bespoke integrations or data migration beyond agreed sources
- Large, multi-environment, or highly distributed estates
- Ongoing managed operations after handover

HOW IT RUNS

Five phases, one fixed outcome

1

PHASE 01

Mobilize

Kickoff, access, and the design workshop.

2

PHASE 02

Deploy

Stand up Elastic on-prem or in Elastic Cloud.

3

PHASE 03

Configure

Ingest, detections, alerting, dashboards, retention.

4

PHASE 04

Validate

Test vs. L2; assemble the evidence pack.

5

PHASE 05

Handover

Runbook, config handover, enablement.

◆ Level 2 within 30 days

◆ Requires Elastic 9.4 or later

THE COMMERCIAL CASE

You approve an outcome, not an estimate.

SYSTEMS INTEGRATOR · OPEN-ENDED

You buy a process

Layered staffing, multiple handoffs, and platform ramp-up, where the final number depends on how the work unfolds and rate cards become the whole conversation.

ELASTIC GPS · THIS PACKAGE

You buy Level 2

One firm, fixed price for a defined production outcome, delivered by the people who build Elastic. Fewer handoffs, less ramp-up, one number you can approve.

WHAT'S DELIVERED

A defined set of deliverables, phase by phase

MOBILIZE

- Kickoff & project setup
- Infrastructure validation
- Discovery & logging design workshop

DEPLOY

- CEM detections & alerting
- THIRF retention & forensics
- Dashboards & detection content (tuned)
- Zero Trust V&A mapping

VALIDATE

- Validation vs. Level 2 outcomes + evidence pack

HANDOVER

- Configuration handover, runbook & enablement

GOVERNANCE

- Project management & governance (all phases)

Every deliverable is built, validated, and documented before handover. The fixed fee does not change with the effort involved.

RIGHT-SIZED FIT

Where a clean, fixed Level 2 does the most work

✓ THIS PACKAGE FITS

A single or consolidated Elastic environment; right-sized entities that want a defensible Level 2 quickly and predictably.

LET'S CUSTOM-SCOPE INSTEAD

Large, highly distributed enterprises, complex multi-environment estates, or a Level 3/4 mandate from day one. We'll tailor a bespoke engagement instead.

FIRM FIXED PRICE

One number. One production outcome.

ALL-INCLUSIVE FIXED FEE

\$39,990 USD

One firm fixed price for the full Level 2 outcome. No open-ended billing. No scope surprises.

Level 2, delivered and documented, by the team that builds Elastic.
